DETAILED ACTION

EXAMINER'S AMENDMENT

1. This action is responsive to the following communication: Request for Continued Examination filed 01/19/2010.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John R. Bednarz (Reg.No. 62,168) on 05/14/2010.

The application has been amended as follows:

Claims 1-14 and 16-18 are cancelled.

Allowable Subject Matter

3. Claim 15 is allowed.

The following is an examiner's statement of reasons for allowance: Independent claim 15, when considered as a whole, is allowable over the prior art of record.

Art Unit: 2179

Specifically, the prior art of Isensee teaches the limitation: "providing a control that allows the user to navigate a 3D scene within a viewport, the user manipulates the control by clicking on the widget to move around the scene along the x, y and z axis at various speeds", But the claims recite a different combination of limitation:

- * view direction controls each indicating of a corresponding view into the three-dimensional scene and causing a display view orientation of three-dimensional scene to change to the corresponding predefined view orientation upon selecting the control and where the view controls rotate in direct correlation to the change in the display view orientation, the view direction controls comprising:
 - * a central core control associated with a perspective view of the scene and causing a display view of three-dimensional scene to change to the corresponding perspective view when selected;
 - * axial controls peripherally positioned with respect to the core control, aligned with the axial dimensions of the scene, associated with corresponding front, back, top, bottom, left side and right side views, shaped to point at the core control indicating the view direction of the axial control with the front view direction control being a different color than the other controls and the axial controls being labeled with axial labels comprising part of the controls; and
 - * a non-axial control peripherally positioned with respect to the core control by a user and indicating a direction of a corresponding view into the three-dimensional scene and causing a display view of three-dimensional scene to

Art Unit: 2179

change to the corresponding non-axial view when selected (herein referred to as “limitations A”).

These limitations are not suggested or shown by Isensee.

Komerska is introduced to teach a widget presented on the display screen wherein the widget rotates corresponding to the user dragging the mouse cursor on the widget. But the claims recite a different combination of limitation: limitation A, that is not suggested or shown by Komerska.

Therefore the claims are allowed over Komerska and Isensee because the claims differ in scope that is not seen or suggested by the prior art. Thus the combination of does not teach limitation A.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
